TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Web: HTML, CSS

Frameworks & Libraries: Flask, Jakarta EE, Vue.js, Ionic, Bootstrap, Jinja2, SQLAlchemy, Pinia

Databases: SQLite, PostgreSQL, MySQL

DevOps: Git, GitHub

EXPERIENCE

Application Developer Intern

May 2026 – August 2026

IBM

Quezon City, PH

- Completed intensive training in core Java and OOP, applying Collections, Exception Handling, JDBC, and JUnit to build robust Jakarta EE enterprise applications.
- Trained in full-stack development using Vue.js, implementing Pinia for state management and Vue Router to build interactive web and mobile applications.
- Migrated a Vue.js task application to the Ionic mobile framework, testing functionality via Android Studio emulators and building deployable APKs.

PROJECTS

NowShowing | Java, Jakarta EE, PostgreSQL, Vue.js, Pinia

- Developed a full-stack movie tracking application utilizing Jakarta EE 10, JAX-RS, and Vue.js 3 to manage real-time cinema data and user reviews.
- Built a secure backend infrastructure utilizing JDBC PreparedStatements for SQL injection prevention and SHA-256 password hashing.
- Integrated the TMDb API for real-time data aggregation, setting up Flyway database migrations and automated JUnit 5 and Mockito unit tests.
- Implemented state management using Pinia, and custom responsive styling to provide seamless navigation across mobile and desktop interfaces.

Flask Bites | Python, Flask, PostgreSQL, Bootstrap, HTML/CSS

- Built a full-stack food ordering website with Flask and PostgreSQL to smoothly handle menu items, user accounts, and secure checkouts.
- Designed a junction table to connect users and menu orders, which safely tracks exact quantities while saving past purchase prices to protect historical data even if menu costs change later.
- Created a responsive, mobile-friendly interface with Bootstrap that requires a secure Argon2-encrypted login so individuals can safely manage a persistent shopping cart and complete orders.

Agendum | Vue 3, TypeScript, Pinia, HTML/CSS

- Built a client-side task management app with Vue 3 and TypeScript featuring full CRUD, persistent local state via Pinia stores, dynamic metrics tracking, conditional filtering, and CSS transition animations.
- Implemented localized data synchronization logic to auto-save tasks and preserve the active app state seamlessly across user sessions.

EDUCATION

FEU Institute of Technology

August 2022 – Present

B.S. in Computer Science, specialization in Software Engineering

Manila, PH

CERTIFICATIONS

IT Specialist – Python | Certiport

July 2024

Introduction to Cybersecurity | Cisco

December 2025
