Skills

- **Programming Languages:** Python, Java, C++
- **Web:** HTML, CSS
- **Frameworks:** Flask, Bootstrap
- **Database:** SQLite, PostgreSQL

Projects

CineLog | *Python, HTML, CSS, Flask, Bootstrap, SQLite*

- Developed a full-stack web application using Flask that allows users to compile their personal top movies, and be able to add, delete, and edit.
- Managed database with SQLAlchemy ORM and performed CRUD operations on a SQLite database.
- Integrated TMDb API using the Python requests library to get movie data.
- Built front-end templates with Jinja2, and styled using Bootstrap and custom CSS.

Turtle Crossing Game | *Python*

- Developed a 2D game in Python using the Turtle module with player-obstacle interaction logic and level progression.
- Increased game difficulty by raising the speed of obstacles (cars) each time the player completed a level without being hit, otherwise it is game over.
- Applied inheritance by using the Turtle class as a parent to the player and obstacle classes to define their attributes, such as shape, color, and movement.

Education

B.S. in Computer Science, Software Engineering

Manila, Philippines

FEU - Institute of Technology

August 2022 - Present

- Thesis: "CLEFT2SPEECH: Phoneme-Level Speech Correction in Post-Cleft Palate Rehabilitation: Integrating Automatic Speech Recognition and Cloning Speech Synthesis"

Certificates

IT Specialist - Python

July 2024

Certiport

Introduction to Cybersecurity

December 2025

Cisco

Junior Cybersecurity Analyst Career Path

December 2025
